

MAN Diesel & Turbo completes assignment in Pakistan

Augsburg, 02.11.2016

MAN Diesel & Turbo and Hyundai Engineering (HEC) have completed the extension of a power plant in Pakistan for the customer Attock Refinery Limited (ARL). The plant, located northeast of Rāwalpindi, is powered by heavy fuel oil (HFO) and supplies electricity to a refinery.

86153 Augsburg, Germany

Three MAN 14V32/40 gensets generate 18 MW of electrical power for the processes in the refinery plant. This equates to the electricity demand of approximately 30,000 households. Hyundai as an EPC service provider (Engineering, Procurement, Construction) was responsible for the construction of the plant whilst MAN took over the design and delivery of the engines and accessories, as well as the training of the operating personnel.

Rāwalpindi is situated in the Punjab region, only a few kilometres southwest of the capital city, Islamabad. Together, the two cities comprise one of the country's largest industrial centres. Also located in Rāwalpindi, are the headquarters of the Attock group, one of the most important businesses within the oil and gas industry in Pakistan.

About MAN Diesel & Turbo

MAN Diesel & Turbo SE, based in Augsburg, Germany, is the world's leading provider of large-bore diesel and gas engines and turbomachinery. The company employs around 14,500 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, India and China. The company's product portfolio includes two-stroke and four-stroke engines for marine and stationary applications, turbochargers and propellers as well as gas and steam turbines, compressors and chemical reactors. The range of services and supplies is rounded off by complete solutions like ship propulsion systems, engine-based power plants and turbomachinery trains for the oil & gas as well as the process industries. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand.
