

Brazilian oil major renews comprehensive service agreement with MAN Diesel & Turbo

Oberhausen / Rio de Janeiro,
02.11.2017

Long-term contract to ensure efficiency and availability of essential turbomachinery units working offshore.

MAN will continue to service 20 gas turbines and compressors on four platforms of Brazilian oil major Petrobras, located in the Atlantic Campos Basin. Following intense negotiations by the two partners, a comprehensive operations and maintenance agreement has now been renewed. Under the contract, MAN PrimeServ, service provider of MAN Diesel & Turbo, continues to ensure maximum efficiency and availability of the turbomachinery for another three years, with an option on further extension. Based on an embedded engineer concept, Petrobras has been entrusting to MAN's comprehensive service for these turbomachines since 2002.

"By renewing the agreement, Petrobras have once more expressed their confidence in our services," says Robin von Plettenberg, Senior Vice President and Head of PrimeServ Turbo at MAN Diesel & Turbo. "Globally speaking, we are currently seeing increasing demand for extensive services like the ones we've been providing to Petrobras for 15 years now. With the appropriate contractual models, we enable our customers to focus on their core business - while we provide necessary technology and ensure that it is efficiently available throughout the entire service life."

MAN Diesel & Turbo and its forerunners have convinced Petrobras with technology and services at numerous points in its oil and gas value chain. In addition to large engines for generating power or propelling ships, the company uses compressor and turbine systems by MAN for production, processing and transporting of hydrocarbons. Further examples include MAN compression technology delivered for floating production, storage and offloading units (FPSO), with which Petrobras is increasing its production in the pre-salt area off the Brazilian Atlantic coast.

Service on the platforms in the Atlantic ocean: MAN PrimeServ and Petrobras have renewed their contract.

About MAN Diesel & Turbo

MAN Diesel & Turbo SE is one of the world's leading suppliers of large diesel and gas engines and turbo machines. Headquartered in Augsburg, Germany, MAN Diesel & Turbo employs around 14,900 members of staff at over 100 international sites, with major facilities in Germany, Denmark, France, Switzerland, the Czech Republic, India and China. The company offers a variety of products, including two- and four-stroke engines for maritime and stationary use, turbochargers, propellers, gas turbines, steam turbines, compressors and chemical reactors. Complete solutions such as ship propulsion systems, engine power plants and turbomachinery units for the oil, gas and process manufacturing industries complement the range of products and services on offer. The MAN PrimeServ brand provides customers around the world with after-sales services.
