

MAN C 0249, the new turbocharger compressor wheel cleaning agent from MAN Diesel & Turbo, efficiently removes contamination without damaging sensitive components.

In response to customer requests – and as part of our policy of continuous product improvement – MAN Diesel & Turbo has released a new product, MAN C 0249.

This cleaning agent gets rid of grease and oil sediments, gummy deposits, soot and other kinds of contamination from sensi-

tive materials, such as aluminium alloys. MAN C 0249 also contains corrosion inhibitors which help to protect the cleaned surface against corrosion. As a result, you can get maximum performance from your turbocharger.

MAN C 0249

A mild yet effective wheel cleaner

Ideal for wheels

MAN C 0249 is a low foaming, biodegradable, neutral detergent, which can be used on all MAN Diesel & Turbo turbocharger compressor wheels. It is suitable for manual external cleaning, wet cleaning devices for turbocharger and cleaning systems such as spray washing machines.

Best when heated

MAN C 0249 is even more effective when heated up to 80 degrees Celsius. In addition, at temperatures of 40 degrees Celsius and above, the cleaning agent is

foam free.

Mild formula

This product is not aggressive, and poses no risk to the items and materials needing cleaning. Nor is it caustic to the skin. What's more, it is classified as non-flammable.
