

# MAN PrimeServ

## Rotor storage

### Description

You are searching for a place to safely store your rotors, ready to use 24/7?

MAN PrimeServ as a leading manufacturer of turbomachinery understands best what is required to conserve and protect your rotors.

We offer safe and temperature-controlled rotor storages in our PrimeServ Workshop-Oberhausen.

We guarantee your rotor to be ready for operation within only a few hours.

If desired we also take care of shipping and installation, please ask your local contact.

### Features

We are able to store any rotor up to 10 t.

Preparation for long term vertical storage will consist of:

- register rotor into tracking log
- visual inspection, photograph
- obtain critical rotor information
- run-out check
- low speed balance check
- design and provide fixture for hanging of rotor
- preserve rotor for storage
- enter rotor into vertical storage

The removal process will include:

- removal of the rotor from storage rack
- removal of preservative as instructed
- run-out check
- low speed balance check
